

RTS Intercom Systems shows the VKP Virtual Keypanel

September 2009
ST/MKT-COM

Straubing – RTS was pleased to show the VKP VoIP Virtual Keypanel at IBC 2009.

The RTS VoIP Virtual Keypanel (VKP) is a Windows-based application that allows any user to have a fully functioning RTS Digital Matrix Intercom user station on their PC. The Virtual Keypanel application connects via the PC's Ethernet connection to any path that can support standard IP protocols, including LAN, WAN, and VPN.

“This really is a new way to look at using the intercom system,” explains Christian Latzelsberger, Senior Product Manager for RTS Intercoms Worldwide.

“The VKP looks and behaves just like our best-selling RTS keypanels, but it is just an application on your computer. This frees up physical real estate on your desk, and allows any PC user on the network to connect the intercom system via Ethernet.”

The RTS virtual keypanel application is compatible with any RTS Digital Matrix Intercom equipped with the RVON interface. The Virtual Keypanel brings a new level of enterprise-wide and remote access to your RTS Digital Matrix Intercom system.

Features

VoIP

Using the same Voice over IP technology as the RVON cards, the VoIP Virtual Keypanel is compatible with any RTS Digital Matrix Intercom system equipped with either RVON-8, RVON-16, RVON-C, or RVON-I/O interfaces.

GUI interface skins

The RTS Virtual Keypanel has three standard skins: CLD Lever Key, Classic Lever Key, and Classic Pushbutton. Other skins can be easily created to fit the needs of individual environment giving a highly application specific configuration option.

Convenience

With VoIP Virtual Keypanel running under Windows, no special dedicated hardware is required. The same PC that runs your general purpose applications, such as spreadsheets, word processors, and AZedit, can simultaneously function as a matrix keypanel.

Worldwide connections

Remote communications using VoIP Virtual Keypanel and a compatible computer, RTS Digital Matrix Intercom communications can be accessed from anywhere in the world that an IP-compliant LAN connection can be made.

Program updates

Program updates can be downloaded to the PC that hosts the VoIP Virtual Keypanel.

Multilingual character sets

The VKP VoIP Virtual Keypanel supports Standard English and Japanese Kanji character sets.

The Bosch Group is a leading global supplier of technology and services. In the areas of automotive and industrial technology, consumer goods, and building technology, some 280,000 associates generated sales of 45.1 billion euros in fiscal 2008. The Bosch Group comprises Robert Bosch GmbH and its more than 300 subsidiaries and regional companies in over 60 countries. If its sales and service partners are included, then Bosch is represented in roughly 150 countries. This worldwide development, manufacturing, and sales network is the foundation for further growth. Each year, Bosch spends more than 3.5 billion euros, or eight percent of its sales revenue, for research and development, and applies for over 3,000 patents worldwide. With all its products and services, Bosch enhances the quality of life by providing solutions which are both innovative and beneficial.

The company was set up in Stuttgart in 1886 by Robert Bosch (1861-1942) as "Workshop for Precision Mechanics and Electrical Engineering." The special ownership structure of Robert Bosch GmbH guarantees the entrepreneurial freedom of the Bosch Group, making it possible for the company to plan over the long term and to undertake significant up-front investments in the safeguarding of its future. Ninety-two percent of the share capital of Robert Bosch GmbH is held by Robert Bosch Stiftung GmbH, a charitable foundation. The majority of voting rights are held by Robert Bosch Industrietreuhand KG, an industrial trust. The entrepreneurial ownership functions are carried out by the trust. The remaining shares are held by the Bosch family and by Robert Bosch GmbH.
