

INSTRUCTION MANUAL

General Description

The ALP-600 Antenna Bracket Kit is a configuration of aluminum brackets with mounting hardware used to securely hold the ALP-600 Telescoping Antenna Mast.

The Universal Stadium Mounting Plate, (Figure 1) can be mounted vertically or horizontally depending upon the object in which it is mounted to. The Antenna Mast Bracket Assembly, (Figure 2) then easily attaches to the previously mounted plate by turning the hand knobs until tight.

Components

- Universal Stadium Antenna Mounting Plate
- Antenna Mast Bracket Assembly
- Antenna Bracket Hardware Kit
- 2 - U-bolts
- 4 - Flat and Lock washers
- 4 - Hex Nuts
- 2 - Lag Screws
- 4 - Wing Nuts
